

April 2, 2009 – Class Assignment – Taylor Out-of-Town

**Environmental Geology
NS218 3:00-5:00 PM**

Professor Brown will be setting you up with a video assignment. She will also handout some additional materials for you to work on. Here's your chore list while I'm gone:

- (1) During class time, April 2, watch the following two digital videos on the big screen in NS215 using windows Media Player; answer the attached review questions:
 - a. I:\Taylor\envgeo_quakes.mpg (25 minutes)
 - b. I:\Taylor\hanford.mpg (50 minutes)

Note: Professor Brown will be able to point you to the drive and folder from her faculty login.

- (2) Homework for next week (due Tuesday April 7):
 - a. Read over the following paper that is linked on the class web site:

[DOGAMI \(1999\) - Special Paper 32 Mitigating Geologic Hazards in Oregon](#)

<http://www.wou.edu/las/phisci/taylor/g473/specpapr32.pdf>

- b. Write a 2 page article summary, following the procedure outlined in the syllabus. An example summary to use as a model is linked on the class web site at:

http://www.wou.edu/las/phisci/taylor/g473/eg_summ.pdf
