### NOW is the time for ecology technology.

Campus Dining has teamed up with a local company, EcNow Tech to green up their TO-GO Coffee Service! EcNow Tech is providing compostable cups AND compostable lids for your campus-coffee pleasure and will be featured in all Campus Dining establishments. You can still have our great Portland Roasting coffee, it's just that NOW you can have your coffee and not feel bad about your 3-cup-a-day habit! Enjoy!

EcNow Tech develops and markets recycled, reusable and compostable products for events, consumers and business. They provide unique closed loop solutions\* to ensure the product lifecycle is truly green. EcNow Tech products are of superior quality and enable their customers to minimize their carbon footprint.

*\* EcNow Tech's goal is to ensure that all of their products will be composted instead of being sent to the landfill. Compostable products are sent to consumers - Waste is packed into compostable trash bags - Full bags are then delivered to a Composting Facility - Nothing is wasted or sent to the landfill.*

#### **A MISSION**

To innovate, develop, manufacture and distribute green products using renewable and recyclable resources, green designs, processes and end of life solutions that ensure a sustainable future for our children and the environment.

#### **CURRENT CAPABILITIES**

- Development of innovative green materials and designs
- Manufacturing and assembly
- Price/performance optimization of products
- Sourcing of green products worldwide
- Unique end of life solutions for green products
- Outstanding customer service
