Sharing your videos on Moodle

1. Sign in to your YouTube account, or create one.

2. Click here to get started.

3. Add a description, tags, title, and adjust privacy settings and category while your video uploads.

We've given this page a face-lift! Check out these tabs to find an easier way to customize your video settings.
When your upload is complete, you will be given a URL you can link to in Moodle.

Log in to Moodle, then complete these steps:

1. Click here to turn editing on
2. Click the "Add a resource" dropdown menu, then select "Link to a file or website."
3. Name your Moodle file link and add a summary. Enter your web address here (YouTube video, external website, etc.).

Then, scroll down and click "Save"
