

MATH 595 FINAL PROJECT PROPOSAL OUTLINE

- I. State your topic(s) and the category you wish to cover.
- II. Cite any resources you have found for your project.
- III. Give a *brief outline* of the ideas you have for your lesson, activities and worksheets.

Include the following:

- What are your main ideas for how you will teach the lesson, how you will interact with the class, how will the children be working, etc.?
- What are your main ideas for student activities / worksheets? Briefly describe.
- What is your idea for a graphing calculator activity connected to this topic?
- What mathematics and techniques from class will you be using?

IV. Presentation:

Briefly describe the ideas you have for your interactive class presentation.
