

Student: _____
Date: _____
Time: _____

Instructor: KAREN BROWN
Course: Math 095: Intermediate Algebra (3) Polynomials
Book: Lehmann: Elementary and Intermediate Algebra: Functions and Authentic Apps, 1e

Assignment: 9.1 Vertex Graph of

1. Graph the function by hand. Give the coordinates of the vertex. Then use a graphing calculator to verify your work.

$$f(x) = 11x^2$$

Use the graphing tool to graph the parabola.

The vertex is .
(Type an ordered pair.)

2. Graph the function by hand. Give the coordinates of the vertex. Then use a graphing calculator to verify your work.

$$f(x) = \frac{1}{4}x^2$$

Choose the correct graph below.

A.

B.

C.

D.

The coordinates of the vertex are .
(Type an ordered pair.)

Student: _____
Date: _____
Time: _____

Instructor: KAREN BROWN
Course: Math 095: Intermediate Algebra (3) Polynomials
Book: Lehmann: Elementary and Intermediate Algebra: Functions and Authentic Apps, 1e

Assignment: 9.1 Vertex Graph of

3. Graph the function by hand. Give the coordinates of the vertex. Then use a graphing calculator to verify your work.

$$f(x) = -2x^2 + 7$$

Use the graphing tool to graph the parabola.

The coordinates of the vertex are .
(Type an ordered pair.)

4. Graph the function by hand. Give the coordinates of the vertex. Then use a graphing calculator to verify your work.

$$f(x) = (x + 2)^2$$

Use the graphing tool to graph the parabola.

The coordinates of the vertex are .
(Type an ordered pair.)

Student: _____
Date: _____
Time: _____

Instructor: KAREN BROWN
Course: Math 095: Intermediate Algebra (3) Polynomials
Book: Lehmann: Elementary and Intermediate Algebra: Functions and Authentic Apps, 1e

Assignment: 9.1 Vertex Graph of

5. Graph the function by hand. Give the coordinates of the vertex. Then use a graphing calculator to verify your work.

$$f(x) = (x + 1)^2 - 5$$

Use the graphing tool to graph the parabola.

The vertex is .
(Type an ordered pair.)

6. Graph the function by hand. Give the coordinates of the vertex. Then use a graphing calculator to verify your work.

$$f(x) = 3(x + 3)^2 - 5$$

Use the graphing tool to graph the parabola.

The vertex is .
(Type an ordered pair.)

Student: _____
Date: _____
Time: _____

Instructor: KAREN BROWN
Course: Math 095: Intermediate Algebra (3) Polynomials

Assignment: 9.1 Vertex Graph of

7. Graph the function by hand. Give the coordinates of the vertex. Then use a graphing calculator to verify your work.

$$f(x) = -\frac{1}{3}(x - 5)^2 + 4$$

Use the graphing tool to graph the parabola.

The coordinates of the vertex are .
(Type an ordered pair.)

8. Graph the function by hand. Then use a graphing calculator to verify your work. Also, find the domain and range of the function.

$$f(x) = -(x - 1)^2 + 2$$

Use the graphing tool to graph the parabola.

Select the correct choice below and, if necessary, fill in the answer box within your choice.

A. The domain of $f(x)$ is .
(Type an inequality or a compound inequality.)

B. The domain of $f(x)$ is all real numbers.

Select the correct choice below and, if necessary, fill in the answer box within your choice.

A. The range of $f(x)$ is .
(Type an inequality or a compound inequality.)

B. The range of $f(x)$ is all real numbers.

Assignment: 9.1 Vertex Graph of

9.

Let $f(x) = (x - 4)^2 + 2$.

- a. Graph f by hand.
- b. Find x when $f(x) = 3$.
- c. Find x when $f(x) = 2$.
- d. Find x when $f(x) = 1$.

a. Use the graphing tool to graph the parabola.

b. Select the correct choice below and fill in any answer boxes in your choice.

- A. When $f(x) = 3$, $x = \square$.
(Use a comma to separate answers as needed.)

- B. The answer is undefined.

c. Select the correct choice below and fill in any answer boxes in your choice.

- A. When $f(x) = 2$, $x = \square$.
(Use a comma to separate answers as needed.)

- B. The answer is undefined.

d. Select the correct choice below and fill in any answer boxes in your choice.

- A. When $f(x) = 1$, $x = \square$.
(Use a comma to separate answers as needed.)

- B. The answer is undefined.

Assignment: 9.1 Vertex Graph of

10. The function graphed below has the form $y = a(x - h)^2 + k$. Determine whether a , h , and k are positive, negative, or zero for the function.

Describe the constant a for the graph.

a

Describe the constant h for the graph.

h

Describe the constant k for the graph.

k

11. Find an equation of the function f graphed to the right.

$f(x) = \square$ (Type your answer in vertex form.)

12. Decide whether it is possible for a parabola to have no x -intercepts. If it is possible, find an equation of such a parabola. If it is not possible, explain why.

Choose the correct answer below.

- A. The parabola $y = (x - 5)^2 - 1$ has no x -intercept.
 B. The parabola $y = (x - 5)^2$ has no x -intercept.
 C. The parabola $y = (x - 5)^2 + 1$ has no x -intercept.
 D. It is not possible. The x -axis must intersect the parabola at least once.

Assignment: 9.1 Vertex Graph of

13. Decide whether it is possible for a parabola to have two x-intercepts. If it is possible, find an equation of such a parabola. If it is not possible, explain why.

Choose the correct answer below.

- A. The parabola $y = (x + 3)^2$ has two x-intercepts.
 B. The parabola $y = (x + 3)^2 - 2$ has two x-intercepts.
 C. The parabola $y = (x + 3)^2 + 2$ has two x-intercepts.
 D. It is not possible. The x-axis must intersect the parabola at most once.

14. Decide whether it is possible for a parabola to have three x-intercepts. If it is possible, find an equation of such a parabola. If it is not possible, explain why.

Choose the correct answer.

- A. Any horizontal line cannot intersect a parabola at more than 2 points. Therefore, it is impossible.
 B. It is possible. $y = (x - 2)^2$.
 C. It is possible. $y = (x + 2)^2 - 5$.
 D. It is possible. $y = (x + 2)^2 + 5$.

15. A student says that to graph $y = (x - 8)^2$, we translate the graph of $y = x^2$ up by 8 units. Is the student correct? Explain.

Choose the correct answer below.

- No
 Yes

The graph of $y = (x - 8)^2$, with $h = 8$, will translate the graph of $y = x^2$ to the by units.
